Abstract

This is a minimal boilerplate for an academic article demonstrating the integration of equations, figures, code snippets, and BibTeX citations.

1 Introduction

This template relies on standard packages. An example citation is placed here [**?**].

2 Equations

The governing equation is presented in Equation 1:

$$e^{i\pi} + 1 = 0 \tag{1}$$

3 Figures

Figure 1 demonstrates the figure environment.

Figure 1: Placeholder for an embedded graphic.

4 Code Listings

A standard code implementation is shown in Listing 1.

Listing 1: Python example

```
1 import sys
2
```

```
def compute_factorial(n: int) -> int:
    if n == 0:
        return 1
    return n * compute_factorial(n - 1)

print(compute_factorial(5))
```
